What is new in official Ping Master 2.35

software version? - New Release. What is expected in the future? Newly-made Ping Master 2.36 be downloaded from current page, we also looking forward to unconfirmed 2.37 release build. You may download and try it direct (Legitimate and Free) or scan mirror links below to get required file for Ping Master full install. System requirements are listed on our website. The latest version of program was updated on 29.08.2016 17:10. Some internet browsers run on Mozilla Firefox.. Best downloads from category "Desktop utilities" submitted by admin. More about Ping Master The Ping Master 2022 Crack is an advanced software utility which supplies you with a Windows service that automatically and periodically sends ping requests to given network addresses, in order to check the connectivity status between your local computer and remote

ones. The installation procedure doesn't take long, and you load the main configuration panel to tinker with app preferences. Configure connection settings

It's possible to set the test interval and timeout (in seconds), number of retry attempts before failure, and whether or not to retry on network exception. Plus, you can specify success and failure commands, as well as edit their parameters. Add IP addresses and save options

The Ping Master Activation Code lets you add as many IP addresses as you want to the list by entering them one entry at a time. Any entry can be later removed from the list. Unfortunately, the app doesn't implement an option that would allow you to load a text document containing numerous addresses, in order to speed up the whole process. Once all settings are saved, it is necessary to restart the ping service to apply them. Program

activity is automatically recorded to a log file that you can inspect anytime to find out whether or not The Ping Master was successful in reaching each indicated IP address, in addition to the date and time stamps. Evaluation and conclusion The tool didn't put a strain on the overall performance of the workstation in our tests, since it required low CPU and RAM to function normally. CPU and RAM usage was low, so it didn't hog system resources. Taking into account its straightforward and intuitive options, The Ping Master should come in handy to a lot of users looking to regularly ping a range of hosts using an automated tool in the form of a Windows service. The Ping Master is a Free, easy to use and use, professional and highly configurable Network Ping utility. The main intention of this software is to check the availabilities of the other computers through the internet for a multitude of IP addresses. The ability to Ping a large number of IP addresses in the same time, eliminates the need for doing this manually by using the commandline interface. The Ping Master also comes with an Application bar and a really nice clear and well made user interface. Key features include: Auto-Reload Timeout Setting - The Ping Master's Auto Reload Timer allows you to set the time in seconds to wait for the results of a ping. Once all your pings are completed, it will auto-reload the list. Custom Ping Command - The Ping Master also lets you use your own ping command

for testing. 2 Ping Lists - The Ping Master allows you to choose which Ping List to use. Multi Ping - The Ping Master will Ping a list of IP addresses using a single ping command. Automatically resets - The Ping Master automatically resets the ping command when the list is finished. Network IP Address Range List - The Ping Master will Ping a list of IP addresses defined in a text file. The text file must have one IP address per line. Custom IP Address - The Ping Master can also Ping any IP address. Custom Ping Command - The Ping Master can also Ping any specified IP address using any ping command that you specify. IP Address Retry Count - The Ping Master will retry a specified number of times if the ping fails. Test Interval - The Ping Master's Test Interval will determine how often the Ping Master will send out pings. Network Exception - The Ping Master's Network

Exception will determine whether or not the Ping Master will send out ping requests on network exceptions. Test Timeout - The Ping Master's test timeout is how long the ping will take before it times out, if ping fails. Speed Test Option - The Ping Master can also speed test a specific IP Address. Operating System Compatibility - The Ping Master is compatible with Windows 98/ME/XP/Vista. Certification - The Ping Master is certified for Windows 98/ME/XP/Vista as a Windows Component application.
