Capitalism is destroying the planet as we know it, but we are destroying ourselves. -Albert Einstein Monday, February 12, 2012 Informed Consent for Eugenics and other Kinds of Genocide Informed consent is a principle of clinical research that requires "an adequate understanding and written consent of the patient for the treatment, the research and the care" (Eugenic practices, as the example in the previous post demonstrates, at the very least relies on the willful ignorance of genetic lineages, for they keep people from understanding that they are part of a line they may not wish to be part of. If you are white and Jewish, you are more likely to be willing to engage in genocide. If you are interested in learning more, here is an article that sums up a lot of what I said in the previous post. It is a British article but I think the cultural context is interesting to note. Notice that genetic selective breeding for
